Sensor Development at MPG HLL

Monday, September 4, 2017 6:00 PM (30 minutes)

Since more than twenty years the semiconductor laboratory of the Max-Planck Society (MPG HLL) is developing high-performing, specialised, scientific Silicon sensors including the integration of amplifying electronics on the sensor chip. This presentation summarises the actual status of these devices like pnCCDs and DePFET Active Pixel Sensors and their applications.
