

## **Session Program**

**16-21 Sept 2018**

## **EMIS 2018**

### ***Session 16 - Ion optics and spectrometers***

CERN, 500/1-001 - Main Auditorium

# Friday 21 September

11:00

## Session 16 - Ion optics and spectrometers

**Session** | **Location:** CERN, 500/1-001 - Main Auditorium | **Convener:** Prof. Hans Geissel

11:00–11:30

### The Magnex spectrometer for double charge exchange reactions

**Speaker**

Manuela Cavallaro

11:30–11:45

### New ion-optical modes of the BigRIPS and ZeroDegree Spectrometer for the production of high-quality RI beams

**Speaker**

Dr Hiroyuki Takeda

11:45–12:00

### ISLA, an Isochronous Separator with Large Acceptance for Experiments with Reaccelerated Beams at FRIB

**Speaker**

A Matthew Amthor

12:00–12:15

### New high-resolution and high-transmission modes of the FRS open up new perspectives for FAIR phase-0 experiments

**Speaker**

Dr Emma Haettner

12:15–12:30

### Status of the CANREB high resolution separator at TRIUMF

**Speaker**

Jens Lassen

12:30
