Projects

- A scientific and technical association of public utility.
- Research in the fields of:
 - Experimental High Energy Physics.
 - Associated Instrumentation.
 - Astroparticles.
 - Radiation Detection Instrumentation.
 - Data Acquisition and Data Processing.
 - Advanced Computing.
 - Applications to other fields, in particular Medical Physics.
- Developed in the framework of large collaborations:
 - CERN
 - ESA
 - SNOLAB
 - GSI
 - NASA
 - AUGER

- LIP has currently two branches: Lisbon and Coimbra.
- LIP has about 170 people, out of which 70 hold a PhD degree and many are academic staff at local universities.

Outline

Who we are

The Lab
The Team

The sites

Infrastructures

Impact

Concerns

Projects

Responsible for all computing activities:

- Local Infrastructure.
- Local User Support.
- GRID and Global User Support.
- R&D in Advanced Computing.

Site Report

M.A. Oliveira

Outline

Who we are

The sites

Infrastructures

Impact

Concerns

Projects

- iSCSI deployment
- VM
- 10 Gbps
- Lustre
 - Upgrades
 - File replication (à la dCache) would be a nice feature.
 - OST management tools would be nice (rebalancing when new OSTs become available, OST substitution, ...).
- STORM - ACLs
- Local/GRID file access (how to properly implement local user access to GRID storage).
- ATLASHOTDISK - to stripe or not to stripe!!!

Responsabilities

- Site administration
- User support
- EGEE TPM
- SWE ticket management
- EGEE ROC management
- Core services management
- National Grid Coordination
- Security Coordination
- National CA operation
- Middleware deployment coordination
- Middleware testing & validation
- Dissemination & Training
