## CP violation in $b \rightarrow s$ penguin decays at BaBar

*Friday 27 July 2007 17:30 (20 minutes)*

We present recent measurements of CP violation in  $b \rightarrow s$  penguin decays using data collected by the BaBar detector at the PEP-II asymmetric-energy  $e^+e^-$  collider at the Stanford Linear Accelerator Center. We present several measurements among which  $\sin 2\beta$  from  $B \rightarrow K\pi^0$ ,  $B \rightarrow \pi^0\pi^0 K_s$  and  $B \rightarrow K_s K_s K^0$  decays.
