

# THE CHALLENGES OF PARTICLE THERAPY

**Prof. Steve Myers**  
Executive Chairman ADAM, Geneva

*Prof. Steve Myers will point out some of the major challenges to provide an efficient and cost-effective system for particle therapy. He will propose a set of important parameters to be used as specifications for particle therapy systems, and match these parameters to the inherent properties of the four types of accelerators used for particle therapy; cyclotrons, synchro-cyclotrons, synchrotrons and linacs.*

## Lunch Seminar

**Wednesday 7th June**  
**13:00-14:00 Fondazione CNAO**
