Introduction

Thursday 2 July 2009 15:30 (10 minutes)

Outcome of the Council week

Presenter: HEUER, Rolf (CERN)

Contribution ID: 1

Type: **not specified**

LHC Status

Thursday 2 July 2009 15:40 (1 hour)

The status of the LHC will be presented. This will include the repair of sector 34, the ongoing consolidation work in the other sectors, and the progress with the new Quench Protection System. The results of recent resistance measurements of the copper stabilizers will be presented. The plans for powering the LHC and the tunnel access restrictions will also be discussed. Finally the planning for the start-up and the programme for future operational consolidation work will be detailed.

Presenter: MYERS, Steve (CERN)
