

# Introduction

ACTS developers meeting

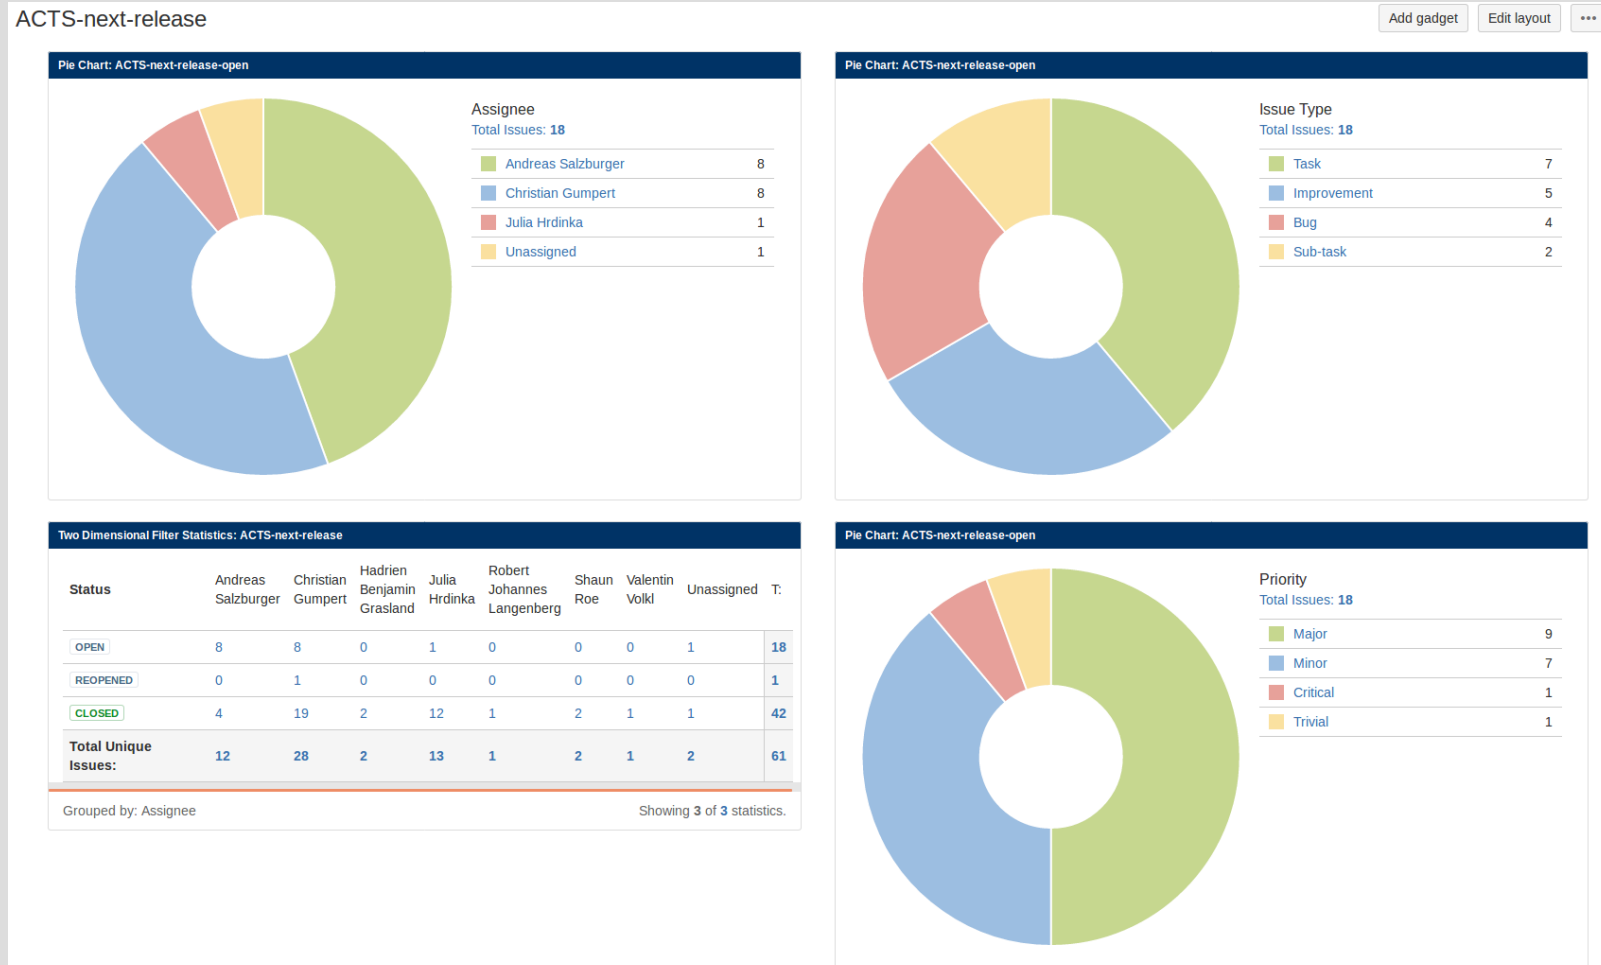

2017-04-04

# Updates

- recently closed issues:
- please remember to set the “fix version”
- towards 0.4

- ACTS-290  
finding dependencies with cmake should print warnings about incompatible versions
- ACTS-288  
Implement different radii for central and outer radii in SubVolumeConfig
- ACTS-289  
Current ACTS master does not link with GCC 6.3.1

- will go through

# Start writing a reference paper

- new Springer journal “Computing and Software for Big Science”
- excellent opportunity to write a reference paper for ATLAS tracking in run 3,4
- successor of rather “old” ATLAS new tracking papers from 2006/2007
- scope: description of concepts as well as (important) implementation details
- time scale: aim for draft by end of this summer (tbc)
- will set up a git repo and invite people to contribute
