

# X-Ray measurements

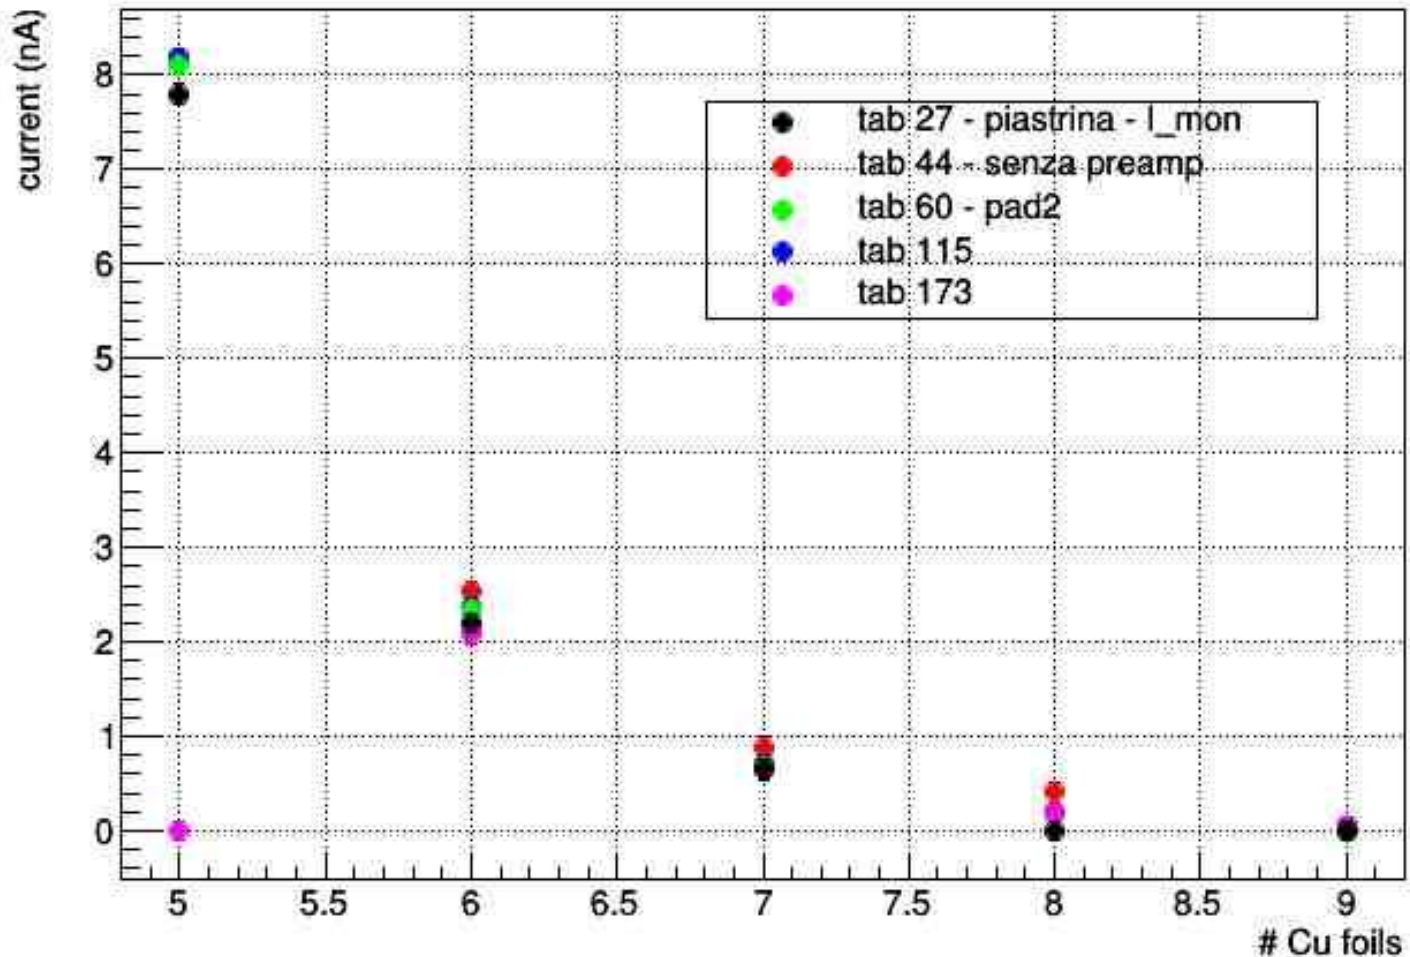

March, 27

Alessia Renardi

Chiara Grieco

# Current vs #Cu foils

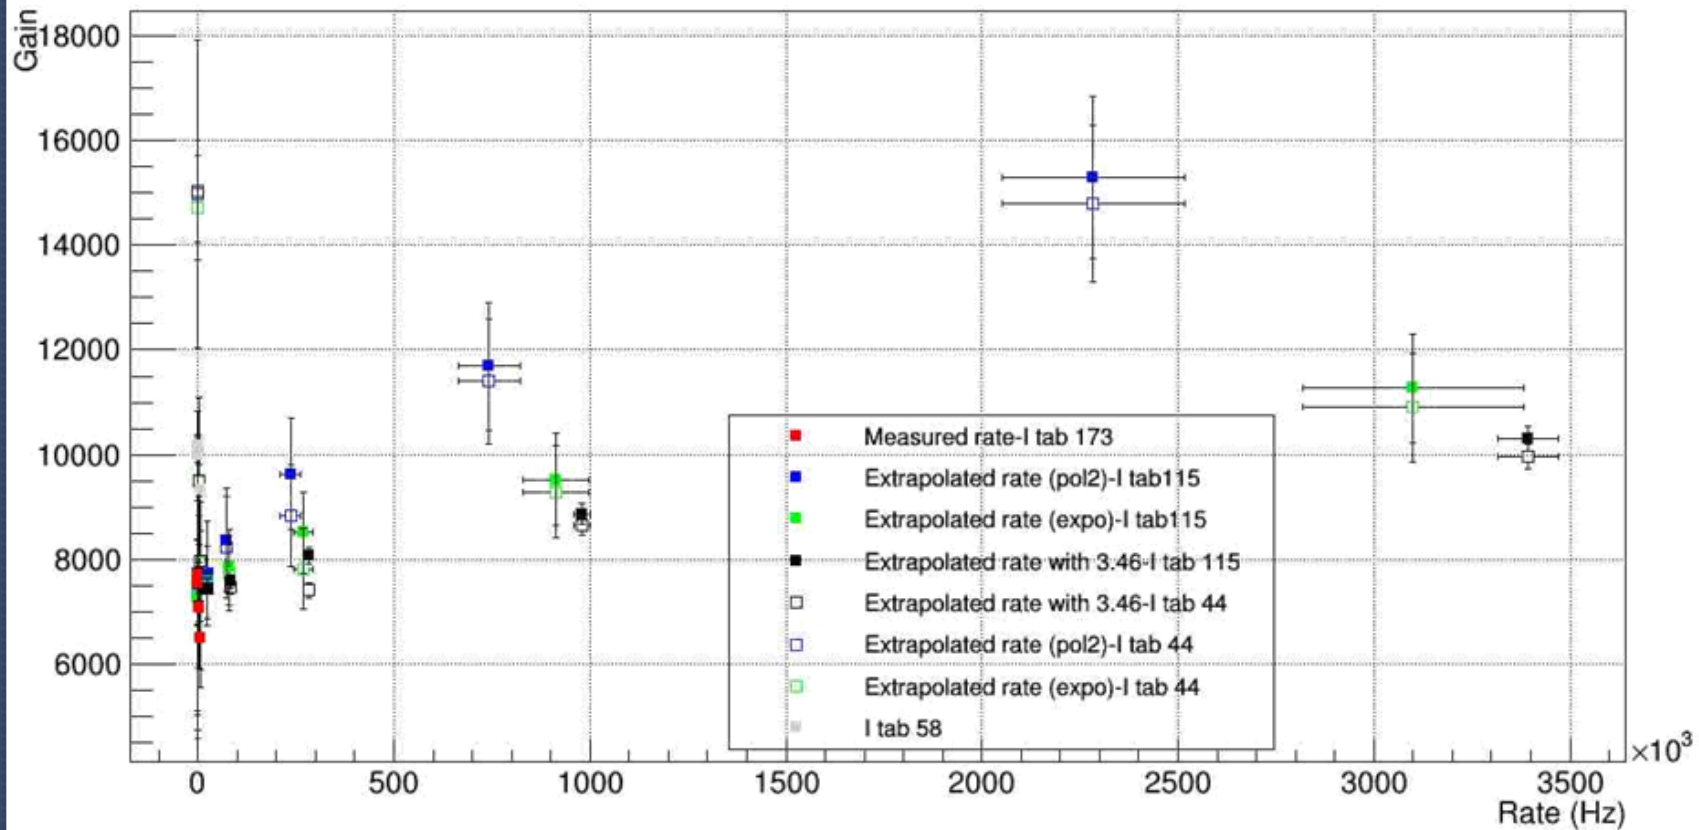

For different tables (search line in logbook), we plotted measured current as a function on number of Cu foils used.

# Gain vs Rate

Three different ways of rate extrapolation:  $C=3.46$ , function "pol2" or "expo". Data from tables at line 44 and 115 of logbook

Gain vs Rate

# Gain vs Rate

Same data of slide 3. Log scale on X. We show only 8 points, first point is lost.
