

# ROOT Planning Meeting

29-3-2017

# IMT Activated by Default

- CMake flag to allow implicit multi threading: -  
Dimt=ON
- Imt ON by default since a few days
  - Available on dev3!
- Implications
  - Can activate implicit multi threading at runtime:  
ROOT::EnableImplicitMT()
  - TBB is looked for in the system, if not found  
downloaded “as external”

# Releases Schedule

We are working on the 6.10/00 release

- 6.09/02: 8-3-17
- 6.09/04: beginning of April
- 6.09/06: beginning of May
- 6.10/00: end of May

How to start testing the many new features in the release?
