

CERN Colloquium

SPEAKER: Roy Glauber (Nobel Laureate in 2005)
TITLE: **Quantum Optics, Diffraction Theory, and Elementary Particle Physics**
DATE: Thu 06/08/2009 16:30
PLACE: Main Auditorium **

ABSTRACT

Physical optics has expanded greatly in recent years. Though it remains part of the ancestry of elementary particle physics, there are once again lessons to be learned from it. I shall discuss several of these, including some that have emerged at CERN and Brookhaven.
