

NA61 BEYOND 2020 WORKSHOP

E. D. Zimmerman
University of Colorado
26 July 2017

A. Blondel
Université de Genève

Welcome to NA61!

- This workshop is designed to discuss the capabilities and physics program of NA61 and build a possible physics case for a next phase after the 2019-20 lab shutdown.
- Today's session is an introduction to the detector, followed by a tour of the detector.
- Tomorrow and Friday we will meet at the University of Geneva. Please follow directions given by Alain (I can help if needed).
- Beyond this workshop, we plan to produce a white paper and are eager for your contribution. Details are to come!
