2017-04-12

v6-10 Plans

- We expect to branch on May 10 (modulo missing features that are close)

- We expect to release end of May (modulo stability issues)

Code News

- Automatic box (e.g. legend) placement

- tweaks and fixes (log scale) still to come

Code News (2)

- Interpreter now optimizes by default

  - bug in clang prevents full inlining with GCC

  - opt can be disabled interactively

- Please watch for missing symbols!

Other News

- Consider heading to Amsterdam, May 22-24: https://indico.cern.ch/event/613842/

  - "the future of data analysis"

Current Work Items

- VecCore

- cling: Windows, unloading, PPC64le

- WebGUI

- ROOT 7 drawing
