LFU tests with semitauonic decays at LHCb

Tuesday 25 September 2018 09:00 (20 minutes)

In the Standard Model, the three charged leptons are identical copies of each other, apart from mass differences. Experimental tests of this feature in semileptonic decays of b-hadrons are highly sensitive to New Physics particles which preferentially couple to the 2nd and 3rd generations of leptons. This talk will review the latest lepton universality tests in semileptonic $b \rightarrow c$ transitions at LHCb.

Presenter: BENSON, Sean (Nikhef National institute for subatomic physics (NL))
