ATLAS GRID Operations and Monitoring

Friday 15 September 2017 17:10 (15 minutes)

Overview of the distributed computing operations of the biggest high-energy physics experiment - ATLAS. The concepts and technologies needed for operation of 500 000 computing cores used by 3000 users will be discussed. A toy-monitoring for 19 000 core computing farm was developed.

Presenters: Mr KONOMAEV, Feodor; Mr KOLEV, Nikolay; Mr BESARABOV, Zvezdin

Session Classification: Projects
