Abid's Visit @LPC

July 27, 2017

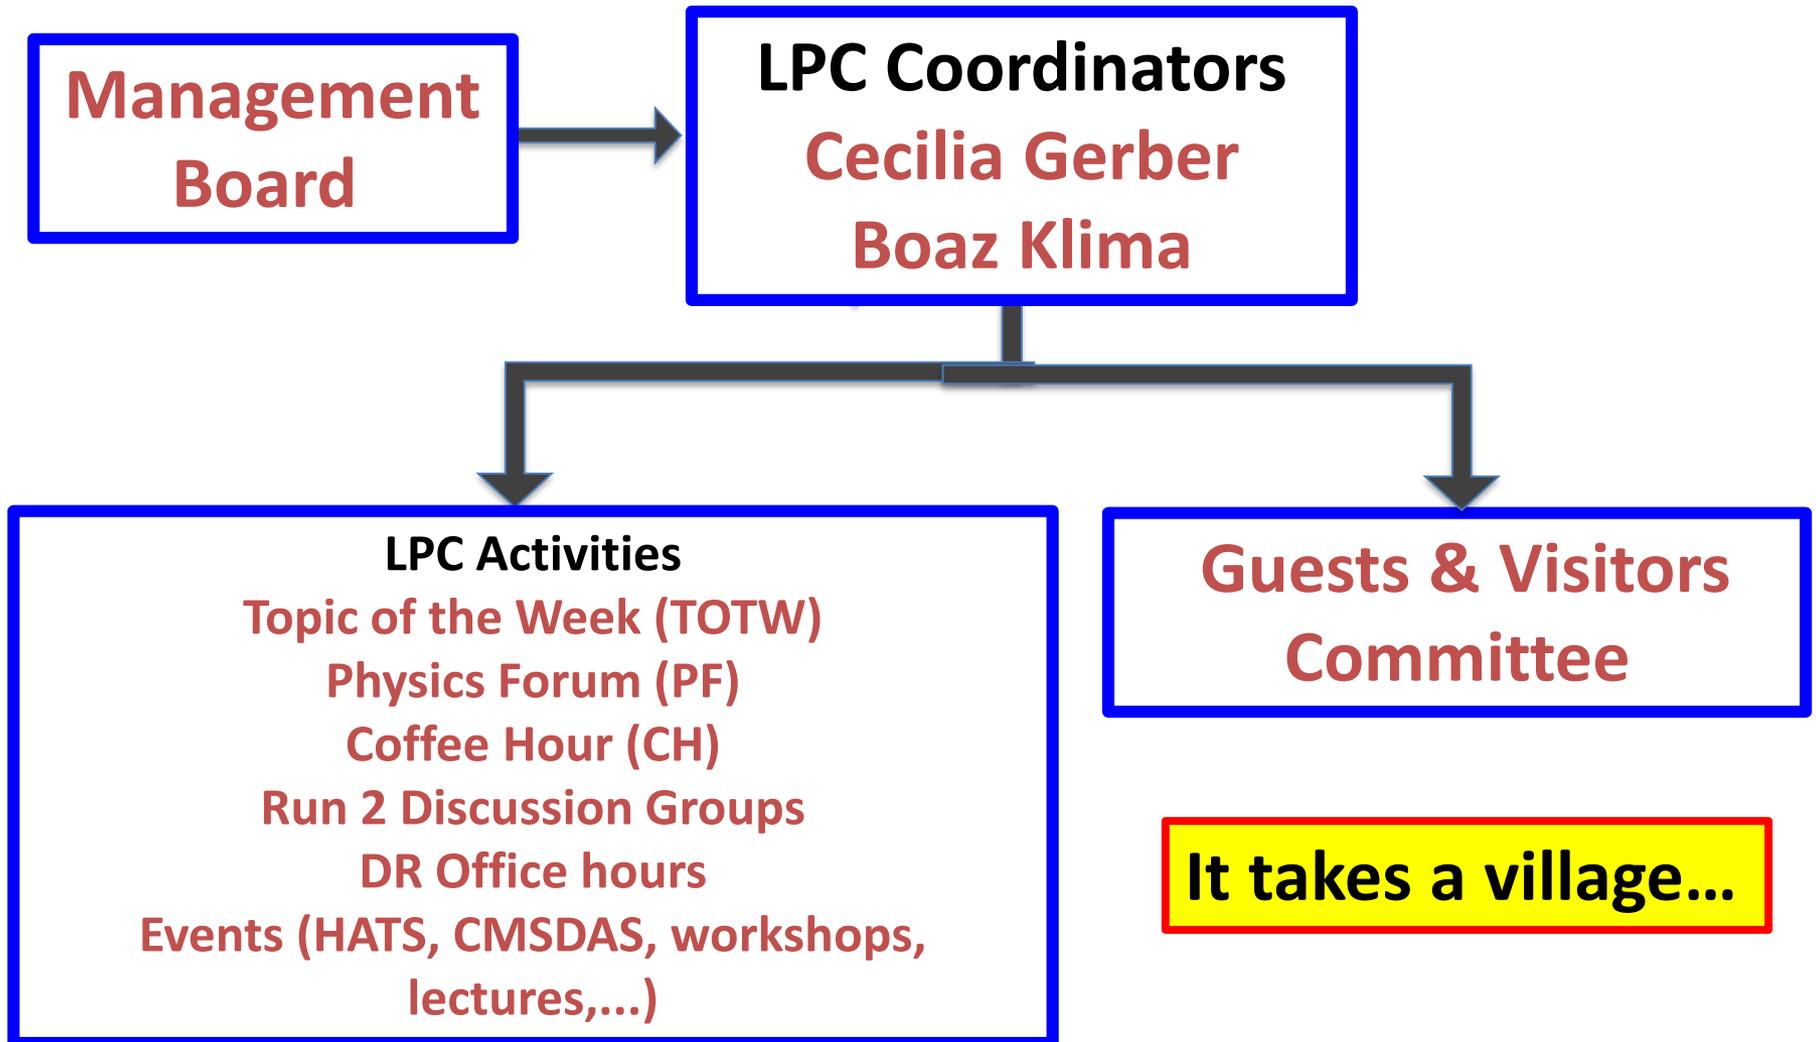

FNAL CMS LPC

- The LPC continues to be an outstanding regional center of excellence for CMS
 - Promotes education, training, and career development
 - Serves as critical link for remote physicists to participate directly in the CMS experiment, in an economical and transparent manner.
 - Allows members to be simultaneously involved in multiple CMS-related activities (analysis, hardware, software, computing, operations)
- LPC as a Resource is being utilized for
 - “help-desk” for analysis:
 - Training: CMSDAS, HATS
 - Intellectual Exchanges & Community building: TOTW, PF, CH, DROH, CDG
 - Support for hardware/software & computing/detector operations:
 - Tracker and HCAL operations; Jet/MET, tagging, lepton ID; MC production
 - Upgrade Phase 1: FPIX, HE, HF; Upgrade Phase 2: HGCAL, Outer Tracker, Pixel
 - Support for Workshops (within CMS and with ATLAS/Theorists)
 - LPC Computing Analysis Facility (LPC-CAF)

LPC Organization

LPC Distinguished Researchers

- Extremely successful program, very competitive
 - Duplicated by ATLAS, Belle, and Intensity Frontier
 - Senior: Leaders in the field resident at LPC for 1 year
 - Juniors: distinguish themselves by establishing an independent research program
 - DRs selected by the MB and funded by DOE & CMS Center
 - ~20/Year, 2:1 ratio junior:senior

Status of applications to the 2018 DR program

- Deadline for applications was June 5, 2017.
- All applications have been reviewed and rated by the entire membership of the LPC management board
- Proposal for the DR2018 program is being constructed these days by the LPC Coordinators, in consultation with Kevin and Lothar, to account for the budget uncertainty

LPC Guests & Visitors

- Facilitate CMS collaborators to spend time at the LPC working on projects that advance, enrich, and impact the interests of the CMS experiment.
- Open to senior and junior, domestic and international, for stays ranging from weeks to months.
- G&Vs selected by the LPC G&V committee and funded by US CMS Operations Program
 - G&V contribute to physics analysis and technical aspects of CMS operations
- Call for applications twice a year, typically in February and August.
- Very successful program – highly praised by all beneficiaries; in great demand!
 - Fall 2017 applications, 19/26 junior and 3/5 senior funded

LPC Graduate Scholars

- New program, first call in 2015.
- Aimed to support exceptional Graduate Students from USCMS institutions, by allowing them to spend a year at Fermilab to pursue thesis research opportunities at the LPC
- Selected by a sub-panel of the MB
- Funded 4 GS in 2016 and 1 in 2017
- Call for applications once a year, in October

LPC Activities

- CMS Data Analysis School (CMSDAS)
 - >100 attendees, student:facilitator 1:1
- Hands-on Advanced Tutorials (HATS)
 - ~15 events, 10-50 participants
- Topic Of The Week (TOTW)
 - Every 2 weeks, ~50 attendees
- Physics Forum (PF)
 - Every 2 weeks, ~50 attendees
- Coffee Hour (CH)
 - 1st Wed of the month, ~50 attendees
- Distinguished Researcher Office Hours (DROH) ***NEW**
 - Every Monday, ~30 attendees
- Run 2 Discussion groups
 - 4 topics, 2/week, alternating
 - 5-20 attendees
 - LPC Computing ***NEW**

Very popular, very well attended

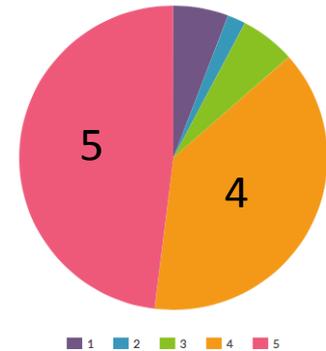

Many initiated by members of the community

DRs and G&Vs are regularly contributing to the organization of the LPC events

2017 LPC CMS DAS

>100 participants
50 students
85% GS, 15% UG
77% from the US
80% new to analysis
98% would recommend CMSDAS to others

Summary of LPC Activities (1 Year*: May 2016-May 2017)

- CMSDAS – 1
- Workshops – 6
- Hands-on Advanced Tutorial Sessions (HATS) – 19
- Topic of the week – 21
- Physics Forum – 12
- Coffee Hour – 9
- Special Lecture Series – 6
- Other - 1
- Bi-weekly discussion groups on:
 - b/t/H/W/Z tagging
 - Jets (including substructure), Missing Et, pileup, and
 - Triggers, lepton ID (e/mu/tau)
 - LPC Computing

* Does not include events during June/July 2017, e.g. 20 HATS
