Deployment of IPv6-only CPU on WLCG - an update from the HEPiX IPv6 Working Group

Tuesday 17 October 2017 15:05 (25 minutes)

This update from the HEPiX IPv6 Working Group will present the activities of the last 6-12 months. In September 2016, the WLCG Management Board approved the group's plan for the support of IPv6-only CPU, together with the linked requirement for the deployment of production Tier 1 dual-stack storage and other services. A reminder of the requirements for support of IPv6 and the deployment timelines of the plan will be presented. The current status will be reviewed including the deployment of dual-stack storage at the WLCG Tier 1s as well as the status and plans for deployment at Tier 2s.

Desired length

20 minutes
