Updates from Database Services at CERN

Thursday 19 October 2017 17:00 (25 minutes)

CERN has a great number of applications that rely on a database for their daily operations and the IT Database Services group is responsible for current and future databases and their platform for accelerators, experiments and administrative services as well as for scale-out analytics services including Hadoop, Spark and Kafka. This presentation aims to give a summary of the current state of the database services at CERN, the recent migration to new hardware and some insights into the evolution of our services.
