Maria Skłodowska-Curie Museum in Warsaw and 150th birthday anniversary celebrations MSC2017 “Medicine-Science-Culture”

Tuesday, 7 November 2017 10:50 (15 minutes)

Izabela D. Madura

Polish Chemical Society, 00-227 Warsaw, Freta 16

Warsaw University of Technology, Faculty of Chemistry, 00-664 Warsaw.

ABSTRACT

The short story of the 50-years of the Maria Skłodowska-Curie Museum in Warsaw 1 will be presented together with the outline of the Polish Chemical Society 2 mission.

Figure 1: Opening ceremony of the Maria Skłodowska Curie Museum in 1967 with maria's daughter, Eva.cs

Opening ceremony of the MSC Museum in 1967 with Marias's daughter, Eva.

The current status of the Museum and its new, modern exhibition plans will be shown to the public. It is worth mentioning here that the project is by famous Polish museums' designers Nizio Design International [3].

In the second part of the talk the planned events aiming to celebrate 150th birthday anniversary of Maria Skłodowska-Curie will be presented. Throughout 2017 a series of events will take place under the motto "Medicine-Science-Culture". The celebrations will be concentrated in Warsaw, the place of Marias' birth, but through the Polish Chemical Society branches it will spread all over Poland, and further to Europe and other continents thanks to various institutions, including Embassies and Polish-U.S. Fulbright Commission.
