

Towards a unified interface for Reinterpretation tools

Tuesday, 17 October 2017 17:00 (20 minutes)

The talk will cover recent developments in Reinterpretation and Analysis Preservations within the Experiments, the status of RECAST as a generic platform for executing reinterpretation with a focus on how the phenomenology tools are integrated on an equal footing to the full experiment implementations.

Presenter: HEINRICH, Lukas Alexander (New York University (US))
