

# HOW TO BOOST YOUR CAREER

**Thomas Beyer, PhD, MBA**  
**Ivo Rausch, PhD**

Medical University Vienna, Centre Medical Physics and Biomedical Engineering, QIMP Group

This will be an interactive session dedicated towards the students attending this meeting. At the end of the meeting you should benefit in the following ways:

1. You will know about how your experience with your career relates to that of your fellow students. We will share experiences and discuss your questions regarding a professional career in the context of our experiences and prior feedback from former summer schools and questionnaires we have used.
2. We offer to work with you and every one of you to check your CV and any pertinent application documents. This should help you get a worthy CV / Apps documentation, which would make you fit for any future application for a new position.
3. We will share our insights into the benefits and forms of collaborative engagements, the best way to publish and how to get funding for your research.

## AGENDA

### **Wednesday**

session 1. Survey of professional interest and results and discussion

### **Wednesday**

session 2. Your CV and application letters: general and individual feedback and tasks for improvement (if any)

### **Wednesday**
