Recent QCD and electroweak results from LHC

Sunday 5 August 2018 09:30 (30 minutes)

Recent measurements from the ATLAS, CMS and LHCb collaborations are testing QCD with unprecedented precision and in a new energy regime.

This talk covers recent measurements by the LHC experiments on the production of jets, isolated photons, electroweak bosons and top quarks.

Author: MUELLER, Katharina (Universitaet Zuerich (CH))

Presenter: MUELLER, Katharina (Universitaet Zuerich (CH))

Session Classification: Plenary

Track Classification: E: QCD and New Physics
