Shift notes from the past week:

=====

ADCoS/CRC reports from the ADC Weekly and ADCoS meetings:
No meetings this week - S&C Week in Valencia

General news/issues during the week:

ADC Technical Coordination Board:
No meeting this week - next one scheduled for 6/19, post-Valencia S&C week.

6/13: ADC Weekly meeting:
No meeting this week - S&C Week in Valencia

6/8: Pilot update from Paul (v69.0) - see:
http://www-hep.uta.edu/~sosebee/ADCoS/pilot-release-v69.0-6_8_17.pdf
A patch was applied later the same day (v69.1):
http://www-hep.uta.edu/~sosebee/ADCoS/pilot-release-v69.1-6_8_17.pdf

MC summary from the ADC Weekly meeting:
No meeting this week - S&C Week in Valencia

=====

1) 6/8: BNL - source file transfer errors ("CGSI-gSOAP running on fts440.cern.ch reports could not open connection to dcsrm.usatlas.bnl.gov:8443"). DNS issue at the site, affecting SRM, FTS, etc. Fixed later the same day. https://ggus.eu/?mode=ticket_info&ticket_id=128859 was closed, eLog 61673. (Related ggus ticket: https://ggus.eu/?mode=ticket_info&ticket_id=128847.)

2) 6/9: UTA_SWT2 - squid service down. A log file on one of the hosts filled up, causing the service to die. Cleaned up the disk and restarted the service. https://ggus.eu/?mode=ticket_info&ticket_id=128906 was closed later the same day. eLog 61689.

3) 6/12: BNL - file transfers to the USERDISK token were failing. Not a site problem, since this token is in the process of being retired at all U.S. sites. Rather, a user had specified the token as the destination for some analysis task outputs. Users were notified via DAST, and the remaining transfers were cleaned up. https://ggus.eu/?mode=ticket_info&ticket_id=128932 was closed, eLog 61736. (Related DDM ops jira ticket: <https://its.cern.ch/jira/browse/ATLDDMOP5-5363>)

Follow-ups from earlier reports:

None
