

40èmes Journées des Actinides & 2nd Workshop on Actinide Targets

Tuesday, 30 March 2010

JDA-WAT I - 503/1-001 - Council Chamber (14:00 - 18:40)

time	[id] title	presenter
14:00	[5] CACAO, a laboratory for the production and the characterization fo radioactive thin layers	Dr BACRI, Charles-Olivier
14:30	[14] Thermodynamic study of the molten salt fast reactor fuel	Dr BENES, Ondrej
15:00	[59] White line of actinide x-ray absorption spectra as a tool for their atomic environment description	DEGUELDRE, c
15:30	[31] Oxidative corrosion of carbide inclusions at the surface of uranium metal during exposure to water vapour.	Dr SCOTT, Thomas
16:00	Coffee Break	
16:30	[66] Review on UC targets (Invited talk)	NOLEN, jerry
17:10	[50] Design concerns for future RIB production facilities at TRIUMF	Dr MORTON, Colin
17:40	[49] Development of an actinide target and laser ion-source test-bed at iThemba LABS, South Africa	Dr BARK, Robert
18:10	[3] The SPES project at LNL	Dr ANDRIGHETTO, Alberto
