

CMS Experiment at the LHC, CERN
Data recorded: 2012-May-13 20:08:14.621490 GMT
Run/Event: 194108 / 564224000

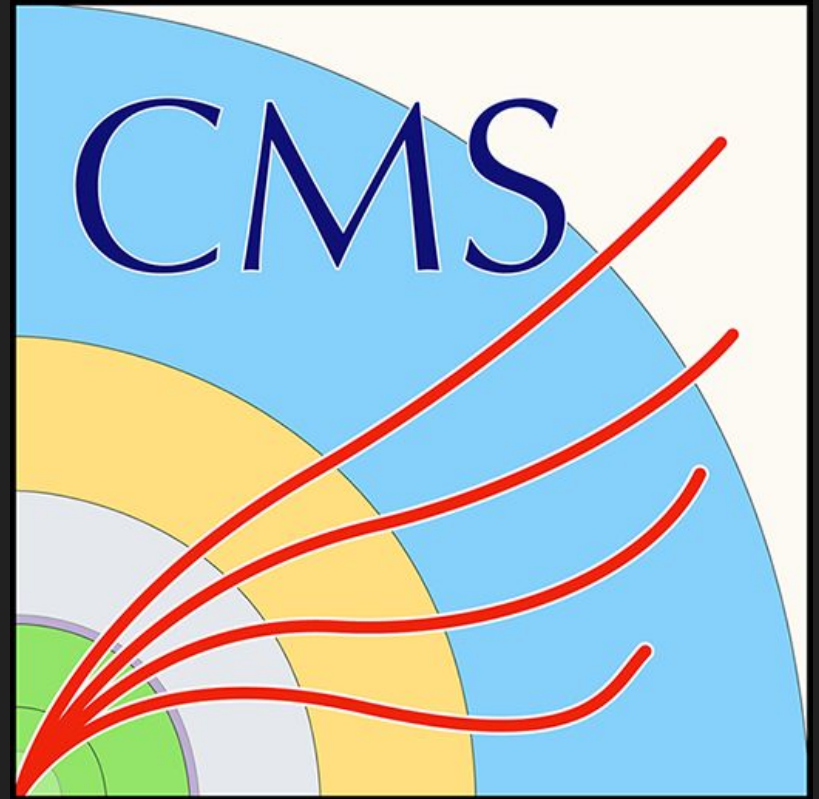

Open Data in education

Join the crew!

What is Open Data?

- Free data for public use.
- Large sets of information.
- Actual data from scientific experiments.
- CMS is one of the largest experiments in the world that will in a few years make all its data public for education, outreach or even outside research purposes. There is a LOT of it out already!

Why you should care about it?

- It's fun and engaging!
- It can bring fresh methods and ideas to your teaching.
- We have powerful and intuitive tools to offer. Free! Easy!
- Using proper data with similar methods that an actual scientist would use can motivate students.
- Multidisciplinary, holistic approach.
- Easy to adapt to your needs.
