

WLCG Collaboration Workshop
21 - 25 April 2008, CERN

Close-out Session

Jamie.Shiers@cern.ch

Worldwide LHC Computing Grid
Distributed Production Environment for Physics data Processing

Future Events

- **CCRC'08 post-mortem workshop 12-13 June at CERN**
 - HEP application cluster at EGEE '08
 - Around that time - overlapping with data taking - we will have to start thinking about 2009: middleware versions, storage-ware, DB services, resources etc and the plans for testing it!
- ↳ **CCRC'09 planning workshop 13-14 November at CERN**
 - WLCG Collaboration workshop in Prague, prior to CHEP '09
 - *number of parallel sessions? (DM? DB? OPS?)*
- *Possible workshop prior to EGEE '09*
- *WLCG Collaboration workshop at CERN, Spring 2010*
- *Pre-CHEP workshop in Taipei prior to CHEP '10*
- *WLCG Collaboration workshop at CERN, Spring 2011*
- *Pre-CHEP workshop in ?????? prior to CHEP '12*
- *EGI-related events?*

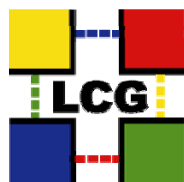

Summary

- ☺ Well attended workshop - discussions (at least in the room) involved more people than at previous WLCG workshops
- **A lot of commonality in feedback from sites**
- Clear(?) list of follow-up actions
- My guess is that future events will be shorter...
- But might well be combined with experiment-specific sessions...

Thanks...

- To everyone for coming; to session chairs; conveners; speakers; note-takers; people who asked questions; people who answered them; people who didn't; anyone I've forgotten...
- **I hope that you found it to be useful...**
- As always, suggestions for improvements are welcome!
- ☺ **As are "volunteers" ...**
