

Quark Matter 2018

Saturday, May 19, 2018

Best-poster flash talks - Sala Grande (11:10 AM - 12:00 PM)

-Conveners: Enrico Scomparin

time	[id] title	presenter
11:10 AM	[953] Measurement of jet fragmentation in pp, p+Pb and Pb+Pb collisions with ATLAS	PURI, Akshat
11:15 AM	[954] Energy dependence of phi (1020) production at mid-rapidity in pp collisions with ALICE at the LHC	TRIPATHY, Sushanta
11:20 AM	[955] Equation of state for QCD with a critical point from the 3D Ising Model	PAROTTO, Paolo
11:25 AM	[956] J/psi in jets in pp collisions at 5.02 TeV with the CMS experiment	DIAB, Batoul
11:30 AM	[957] Direct flow of heavy mesons as unique probes of the initial Electro-Magnetic fields in Ultra-Relativistic Heavy Ion collisions	COCI, Gabriele
11:35 AM	[958] Dimuon Invariant Mass Spectra with the Muon Telescope Detector at STAR in p+p collisions at 200 GeV	BRANDENBURG, James
11:40 AM	[959] Direct photon flow in ALICE	SAS, Mike Henry Petrus
11:45 AM	[960] The curvature of the pseudocritical line from lattice QCD: Taylor expansion and Analytic continuation compared	NEGRO, Francesco
11:50 AM	[961] f0(980) resonance production in pp collisions with the ALICE detector at LHC	LORENZO, Alessandra
11:55 AM	[962] Non-linear dynamical systems approach to out of equilibrium hydrodynamical attractors: the Gubser flow case	Mr CRUZ CAMACHO, Nicolás
