

SILVIA FERRERES SOLÉ

Originally from Spain, I will start on September the final year of my master's degree in Theoretical Physics at Lund University (Sweden).

I obtained my bachelor's degree at Universidad Complutense de Madrid (Spain) on 2016. On my last year of BSc, I worked as an inter at CIEMAT (Madrid) performing a sample selection research of top quarks in pp collision from data taken at LHC on 2015.

Currently, I am a Summer Student at the Muon POG Group (CMS) studying the performance of the new HLT muon reconstruction used in CMS.
