

## **Summary Lukas Sohl**

Lukas Sohl comes from Bochum a city in western Germany. He is studying physics at the Ruhr-Universität Bochum. He is now in his last master year and will write his thesis about his work here at CERN.

At CERN he is working in the gaseous detector development group. There they develop new Micromegas Detectors for fast timing applications.

After his graduation he wants to continue in the field of detector development as a Ph.D student. He is very interested in new technologies and all the possibilities here at CERN.
