

# Visualization WG next steps: points for discussion

- First of all: **we should complete the CWP paper! :-)**
  - Please, fork the repo and contribute in editing it: <https://github.com/HSF/Visualization>
- What **common projects** could we identify?
- Are there issues we can try to **solve together**?
- Do you have **solutions, demonstrations, tutorials** you want to **share**?
  - We have a **repo section** for that: <https://github.com/HSF/Visualization/tree/master/demonstrators>
- Can we set tentative timelines for common/joint projects?
- We can organise a **follow-up topical workshop** to show advancements. **Autumn**, maybe?
