

WORK PROGRAMME 2010¹

CAPACITIES

(European Commission C(2009) of 2009)

¹ In accordance with Articles 163 to 173 of the EC Treaty, and in particular Article 166(1) as contextualised in the following decisions: Decision 1982/2006/EC of the European Parliament and of the Council of 18/12/2006 concerning the 7th Framework Programme of the European Community for Research, Technological Development and Demonstration (2007 – 2013) and the Council Decision 2006/974/EC of 19/12/2006 adopting a Specific Programme for Research, Technological Development and Demonstration 'Capacities' (2007 – 2013).

Capacities Work Programme

TABLE OF CONTENTS

- i. General Introduction**
 - 1 Research Infrastructures**
 - 2 Research for the benefit of SMEs**
 - 3 Regions of knowledge**
 - 4 Research Potential**
 - 5 Science in Society**
 - 6 Support for the Coherent Development of Research Policies**
 - 7 Activities of International Cooperation**
-
- Annex 1: International Cooperation Partner Countries**
 - Annex 2: Eligibility and Evaluation Criteria for Proposals**
 - Annex 3: Forms of Grant and Maximum Reimbursement Rates for Projects Funded Through the Capacities Work Programme**

i. General Introduction

This is the work programme for 2010 for the Capacities Specific Programme of the 7th Framework Programme for Research, Technological Development and Demonstration Activities.

The work programme was adopted by the Commission, with the assistance of the Programme Committee.

This work programme provides additional detail of the implementation of the Specific Programme, setting out information on the priorities, objectives and policy relevance of the research topics which will be implemented through calls for proposals in the latter half of 2009.

The Capacities work programme is structured around 7 chapters, setting out the implementation of the parts. In general, each chapter is self-standing; however, applicants are advised to read this general introduction in addition to the chapter(s) containing the part(s) of interest. A range of issues of relevance to the Capacities work programme as a whole are also set out in Annexes 1-3.

In preparing this work programme, the Commission has relied on advice from a wide range of consultations, including from specific advice of a series of advisory groups². The advisory groups are groups of independent, high-level, experts which have been set up by the Commission to advise on the implementation of Community research policy in all parts contained in this work programme, except for the Coherent development of policies. The experts were chosen based on their knowledge, skills and significant experience in the field of research and aligned issues covered by the Parts. More information on the members, and the work, of the advisory groups can be found on the Europa website.

In the implementation of the Capacities Specific Programme, attention is also paid to the working conditions, transparency of recruitment processes, and career development as regards the researchers recruited on projects and programmes funded, for which the Commission Recommendation of 11 March 2005 on the European Charter for Researchers and on a Code of Conduct for the Recruitment of Researchers³ offers a reference framework, while respecting its voluntary nature.

This work programme, in particular parts 1 (Research Infrastructures), 2 (Research for the benefit of SMEs), 3 (Regions of Knowledge) and 4 (Research Potential), can also contribute to allow the enhancement of synergies and complementarities between FP7 and Cohesion Policy investments in research and innovation as described in the related communication from the Commission^{4 5}.

This work programme contributes to meeting the overarching objective for European research policy of developing an open, competitive and excellent European Research Area (ERA). The

⁴ COM (2007) 474 of 16.8.2007.

⁵ In this context project applicants are encouraged to check the operational programme for the Structural funds applicable in their region (see: http://ec.europa.eu/regional_policy/atlas2007/fiche_index_en.htm)

main premise for ERA is to overcome deficiencies and inefficiencies arising from fragmentation, sub-criticality and duplication in R&D activities, and from a lack of policy coherence and coordination at and between regional, national and European level. The realisation of ERA depends upon the extent to which the Ljubljana Process⁶ succeeds in matching high-level political/ ministerial commitment and steering with commensurate concerted action and strong and sustainable partnerships between the Member States and the European Commission. Concrete actions taken are inspired by the common vision for ERA in 2020⁷ and are clearly orientated towards realising the fifth freedom of circulation of researchers, knowledge and technology within a European internal market for research.

By funding excellent state-of-the-art research in key priority areas and pooling research resources, this work programme boosts R&D investments in Europe, fosters better integration of European R&D, and raises research excellence.

More specifically, the overall aim of the Capacities programme is to enhance research and innovation capacities throughout Europe. This is achieved by supporting a wide range of initiatives: to optimize new and existing research infrastructures in Europe; to strengthen the innovation capacity of SMEs; to enhance the research potential of European regions and research-driven clusters; to unlock the research potential of the EU's convergence and outermost regions; to stimulate the harmonious integration of scientific and technological endeavor into European society; to improve the coherence of national and European Community research policies; and to build strategic R&D partnerships with non-EU countries. Thus, by increasing the impact of public research and its links with industry, and by strengthening public support and its leverage effect on investment by private actors, the Capacities programme is a key element to the further development of ERA.

Scope of Work Programme

The scope of this work programme corresponds to that defined in the Capacities Specific Programme. The calls for proposals planned within this work programme are those which are scheduled to be launched in the second half of 2009.

Gender

The pursuit of scientific knowledge and its technical application towards society requires the talent, perspectives and insight that can only be assured by increasing diversity in the research workforce. Therefore, all projects are encouraged to have a balanced participation of women and men in their research activities and to raise awareness on combating gender prejudices and stereotypes. When human beings are involved as users, gender differences may exist. These will be addressed as an integral part of the research to ensure the highest level of scientific quality. In addition, specific actions to promote gender equality in research can be financed as part of the proposal, as specified in Appendix 8 of the Negotiation Guidance Notes.⁸

Ethical Aspects

⁶ Following the 2007 ERA Green Paper, the Ljubljana Process was launched by the Competitiveness Council of 30 May 2008.

⁷ The ERA Vision 2020 was adopted by the Competitiveness Council on 2 December 2008, see doc. 16767/08.

⁸ Available from http://cordis.europa.eu/fp7/find-doc_en.html

All research carried out under this work programme must respect fundamental ethical principles, and the requirements set out in the text of the Capacities Specific Programme. More information on the procedures for the peer review of submitted proposals is given in the 'Rules for Submission of Proposals and the Related, Evaluation, Selection and Award Procedures'.

The Commission is fully committed to the principles set out in the declaration on the use of human embryonic stem cells, as set out in the annex to the Commission Communication COM(2006)548 of 26 September 2006. This states that the Commission will maintain the practice of the 6th Framework Programme. Accordingly the Commission will not fund projects which destroy human embryos, including for the procurement of stem cells. The exclusion of funding of this step of research will not prevent Community funding of subsequent steps involving human embryonic stem cells.

Support under the Capacities programme

This specific programme will support a range of actions involving the active collaboration of research teams from all sectors, including industry, SMEs, universities and other higher education institutions, research institutes and centres, international European interest organisations, civil society organisations, and any other legal entities. These actions will be implemented through the funding schemes: Collaborative Projects; Networks of Excellence; Coordination Support Actions and Research for the benefit of Specific Groups (in particular SMEs). Researchers based in Associated Countries may take part in the Capacities programme on the same basis and with the same rights and obligations as those based in Member States unless otherwise stated. International cooperation represents an important dimension of all research activities carried out in the Capacities Programme. [All activities will be open to participation by legal entities from third countries. This concerns both International Cooperation Partner Countries \(ICPC, full list provided in Annex I\) and other third countries, including the associated countries. Organisations from associated and ICPC countries are eligible for funding in all cases. Organisations from other third countries are eligible for funding under the conditions laid down in Art 29 \(2\) of the Rules for Participation.](#) There is provision for the financing of the participation of research partners from the ICPC countries from the FP7 budget. Some topics of the work programme, in areas of mutual interest and benefit, may target the participation of specific third countries. The participation of third countries may also be implemented in the form of coordinated or joint calls. Chapter 7 of this work programme focuses specifically on a range of activities designed to support and stimulate the participation of third countries in the Framework Programme.

Coordination of non-Community Research Programmes

The coordination of non-Community research programmes is an important and integral part of the development of the European Research Area. This programme builds on the success of activities carried out in the 6th Framework Programme. Actions foreseen in the Capacities work programme will make use of two specific approaches – the ERA-NET scheme and the participation of the Community in jointly implemented national research programmes (through Article 169 of the Treaty).

A legislative proposal for the Article 169 initiative foreseen in the 'Research for the benefit of SMEs' part was presented in 2007⁹. This initiative, called 'Eurostars', is aimed at supporting research & development performing SMEs.¹⁰

In this work programme only ERA NETs which are within the scope of one of the parts will be supported and any call is clearly indicated in that part

Risk-Sharing Finance Facility

Improving access to loans for RTD actions requires public support to overcome market deficiencies for the financing of riskier European RTD actions, which often involve a high level of risk. In accordance with Annex III of the Capacities Specific Programme, the Community has provided a contribution to the European Investment Bank (EIB) for a Risk Sharing Finance Facility (RSFF) with a view to foster primarily private sector investment in research, technological development and demonstration (RTD) as well as innovation. This new financing instrument has been designed by the European Investment Bank with the support of the EC.

In compliance with the Capacities Specific Programme, the development of research infrastructures funded by the Community under this Specific programme shall be automatically eligible for the RSFF. Other research infrastructures responding to European research principles and criteria could also be considered. Legal entities established in third countries other than Associated countries are also eligible if they participate in FP7 indirect actions and their costs are eligible for Community funding, or, in the case of Research Infrastructures, if the beneficiary is able to demonstrate that either the infrastructure(s) ownership or operation(s) involve, or will involve, independent legal entities in at least three Member States or Associated States, or the infrastructure(s) services are, or will be, used or requested for use by research communities from at least three Member States or Associated Countries..

Further information on the Risk-Sharing Finance Facility is given in part 1 of this work programme.

Submitting a Proposal

Proposals should be submitted in accordance with the terms set out in a call for proposals. In order to submit a proposal, applicants should consult the following documents:

- The text of the call for proposals, as announced in the Official Journal of the European Union and published on CORDIS website and the 'Participants Portal';
- This work programme; and
- The relevant Guide for Applicants

There are also a number of other useful texts, which applicants could refer to, including the Specific Programme 'Cooperation', the Rules for Participation for FP7, the 'Rules for

⁹ COM(2007) 514 final of 12.9.2007

¹⁰ Another legislative proposal for an Article 169 initiative foreseen under the Cooperation Specific programme was also presented in 2007. This initiative is aimed at enhancing the quality of life of older people through the use of new ICT technologies ('Ambient Assisted Living').

Submission of Proposals and the Related, Evaluation, Selection and Award Procedures', and the Commission Recommendation on the European Charter for Researchers and on a Code of Conduct for the Recruitment of Researchers. These documents, and other relevant background documents, are available on the CORDIS website¹¹. The forms of the grant which will be used and the maximum reimbursement rates for projects funded through the Capacities work programme are set out in Annex 3.

In addition, every Member State and Associated country has appointed a set of National Contact Points (NCPs) to assist potential and successful applicants. There is a NCP for each of the parts of the Capacities Programme, except for the 'Support to the Coherent Development of Research Policies'. Applicants are encouraged to make contact with the relevant NCP from their country.

Evaluation Criteria and Related Issues

The 'Rules for Submission of Proposals and the Related, Evaluation, Selection and Award Procedures' set out the basic procedures to be followed by all programmes under the 7th Framework Programme.

The set of eligibility and evaluation criteria for this work programme is given in Annex 2. Any deviations or complementary criteria, which may apply, are clearly set out in the relevant chapter of this work programme and in the text of the calls for proposals.

All proposals which deal with ethical issues and all proposals for which ethical concerns have been identified during the evaluation process may be reviewed by a separate ethical evaluation panel, before they can be selected for funding. Further information on this ethical review and all aspects of the evaluation procedure are given in the 'Rules for Submission of Proposals and the Related, Evaluation, Selection and Award Procedures'.

The work programmes, and consequently the calls for proposals, may specify and restrict the participation of legal entities, according to their activity and type, or according to the funding scheme used.

Calls for proposals may involve a two-stage submission and/or a two-step evaluation procedure. When such a procedure is employed, this is clearly stated in the text of the call for proposals and the Guides for Applicants. More information on two-stage submission and two-step evaluation is given in the 'Rules for Submission of Proposals and the Related, Evaluation, Selection and Award Procedures'.

In carrying out the evaluations of proposals received, the Commission may choose to send the proposals to external experts, or to make the proposals available electronically, so that the experts may carry out their examination and review of the proposals at their home and/or their place of work.

Prior Information of Candidates, Tenderers and Grant Applicants

(Article 8 of Decision on the EWS and Article 13 of Regulation on the Central Exclusion Database)

¹¹ http://cordis.europa.eu/fp7/find-doc_en.html

Candidates, tenderers, grant applicants and, if they are legal entities, persons who have powers of representation, decision-making or control over them, are informed that, should they be in one of the situations mentioned in:

- the Commission Decision of 16.12.2008 on the Early Warning System (EWS) for the use of authorising officers of the Commission and the executive agencies (OJ, L 344, 20.12.2008, p. 125), or
- the Commission Regulation of 17.12.2008 on the Central Exclusion Database – CED (OJ L 344, 20.12.2008, p. 12),

their personal details (name, given name if natural person, address, legal form and name and given name of the persons with powers of representation, decision-making or control, if legal person) may be registered in the EWS only or both in the EWS and CED, and communicated to the persons and entities listed in the above-mentioned Decision and Regulation, in relation to the award or the execution of a procurement contract or a grant agreement or decision.

Budget Figures in This Work Programme

This work programme draws on financing from the 2010 budgetary year. All budgetary figures given in this work programme are indicative.

Unless otherwise stated, final budgets may vary following the evaluation of proposals.

The final budget awarded to actions implemented through calls for proposals may vary:

- The total budget of the call may vary by up to 10% of the total value of the indicated budget for each call; and
- Any repartition of the call budget may also vary by up to 10% of the total value of the indicated budget for the call.

For actions not implemented through calls for proposals:

- The final budgets for evaluation, monitoring and review may vary by up to 20% of the indicated budgets for these actions;
- The final budget awarded for all other actions not implemented through calls for proposals may vary by up to 10% of the indicated budget for these actions.
