

# The Future of Structural Biology within the RÅC

**Monday, 9 October 2017 - Tuesday, 10 October 2017**

## Scientific Programme

Structural Biology is the branch of science concerned with the molecular structure, shape, and function of biological macromolecules. Owing to its importance for all aspects of biomedicine, biology and biochemistry, Structural Biology has been made an integral part of the German-Swedish RÅC collaboration. The workshop aims at initiating new and fostering existing collaborations between German and Swedish groups within the RÅC frame and at shaping the future of Structural Biology within RÅC.
