Tractebel Engineering (Oil & Energy Industry)

Monday 13 November 2017 20:15 (12 minutes)

Otilia holds a PhD in Experimental Physics on the “Development of the SM Tracker of the CMS experiment at CERN” which she obtained in 2000

Between 1996 and 2012 she joined CERN as an external member (first for INFN Pisa and Perugia, then for the Catholic University of Louvain) to participate in the development of the Silicon Tracker of CMS, based on silicon microstrips sensors.

In 2012, she left research and joined the ENGIE GROUP (former GDFSUEZ) in Brussels which is one of the leading industrial groups in Belgium and a reference in the energy sector.

Presenter: MILITARU, Otilia
