Dear all,

Here is as promised the list of talks foreseen for the low x and diffraction session:

1) Theory: Antoni Szczurek / Tobis Toll / Somebody from Agustin Sabio Vera's group, probably David

Gordo - there might be additional contributions

2) LHCb: review (exclusive diffraction)

3) CMS: 3 talks confirmed: CT-PPPS / CMS and TOTEM combined (includes jets and TOTEM total, elastic,

inelastic cross sections) / very forward jets and jet gap jet

4) ATLAS: 3 talks requested, but no answer received so far: AFP / soft diffraction and total. elastic, inelastic cross sections / exclusive diffraction

5) LHCf: review talk, agreed

6) HERA: review talk, to be confirmed if speaker available

Thanks

Regards

Martin/Christophe
