

Status Report

Underlying Event & Minimum Bias Working Group

Deepak Kar & Ramandeep Kumar

1st Organisers+Conveners+IAB meeting

September 6, 2017

for 9th MPI@LHC workshop (Shimla, India)

Abstracts Received so far

- **ATLAS collaboration**

1. ATLAS latest MB and UE measurement
2. ATLAS substructure measurements sensitive to soft QCD effects

- **CMS collaboration**

1. Recent Minimum Bias and Underlying Event measurements at CMS

Summary

- A number of experimental groups are contacted.
- A total of 6 experimental abstracts were selected for the UE & MB WG in the last edition of the workshop.
- Waiting for more experimental talks (in particular from ALICE and STAR collaborations).
- Not able to get any speaker from the THEP community!
- Seeking the possibility of registration of more students, we are planning to give a little longer 'Introduction' talk (depending upon number and time constraints for other presentations)
