Sync and Share at SURF

Monday, January 29, 2018 6:20 PM (15 minutes)

The past year we were able to add a number of extra features to the SURFdrive service in order to make it more attractive to users and institutes and there is more to come. Another thing that we have observed is that several institutes and research groups have a need for a SURFdrive in a version more tailored to their needs. SURFdrive is fine as it is but it is a one size fits all solution. Different researchers have different needs and we will cater for that with a separate service that we are currently setting up. This service also provides the capability to serve data to other compute and archiving resources at SURFsara.
