Seafile - what's new in 2017 and future roadmap

Tuesday 30 January 2018 15:35 (20 minutes)

Seafile is an open source file sync and share solution. Thanks to its high performance, scalability and reliability, it has been successfully used by many organizations in Europe, North America and China.

In this presentation, we'll provide a review of Seafile's development in 2017, and what we plan to accomplish in the future. We'll also present a site report from China with heavy usage, demonstrating the scalability of Seafile in real world scenario, and also some performance tuning lessons learned.
