

Instrumentation: What to expect next year (15' + 5')

Thursday 14 December 2017 09:40 (20 minutes)

Abstract:

This talk will present the expectations for the LHC Beam Instrumentation and Transverse Damper (ADT) going into the 2018 run. Planned upgrades during the YETS will be presented and opportunities for future development in order to better exploit the available instrumentation will be discussed.

Presenter: LEVENS, Tom (CERN)

Session Classification: Session 6: Operational Scenario 2018
