

AIM of the workshop:

Topical workshop with the aim to explore the potential of meson production for GPD studies at EIC

Next-generation GPD Studies With Exclusive Meson Production At EIC

11-14 June 2018
CFNS Stony Brook
US/Eastern timezone

Overview

Timetable

Registration

Participant List

Agenda:

- a) Review of recent advances in the theory of meson production and experimental tests of the reaction mechanism
- b) Assessment of the physics case for exclusive meson production in the various channels (heavy, vector, pseudoscalar) and the specific challenges of such measurements
- c) Planning the development of simulation tools and impact studies

Location: CFNS – Stony Brook U.

Dates: June 11-13
