Measurement of $B^0_s \rightarrow \psi(2S)\phi$ / $B^0_s \rightarrow J/\psi\phi$ ratio

Friday 5 January 2018 20:55 (5 minutes)

In this talk we will have a brief look at the two decay modes $B_s^0 \to J/\psi\phi$ and $B_s^0 \to \psi(2S)\phi$ and the measurement of the corresponding ratio. To guarantee identical topologies between the two decays we have chosen to only look at the $\psi(2S) \to \mu^+\mu^-$ and $J/\psi \to \mu^+\mu^-$ modes. A quick look at the peaking backgrounds $B_s^0 \to J/\psi f_0(980)$ and $B_s^0 \to \psi(2S) f_0(980)$ is also given attention.

Summary

Author: KOLSTOE, Haakon Midthun
Co-author: EIGEN, Gerald (University of Bergen (NO))
Presenter: KOLSTOE, Haakon Midthun
Session Classification: Lightning talks and "Kos"
