CERN Computing Account and E-Mail Address

Information for newcomers

Once you register at the CERN registration service (1st floor of building 55 just outside of CERN entrance B), your **Primary CERN Account, CERN e-mail address & mailbox** are created automatically. At this point you must take the following actions:

Step 1:

Contact the **CERN Service Desk** to "activate" your account and obtain the login name and a temporary password. You can do this by:

- **Visiting the CERN Service Desk** (building 55, 2nd floor, just outside of CERN entrance B). **Please bring your identification documents** (CERN access card, identity card or passport).
  A Self Service Account Activation Station is also available for your convenience, and the CERN Service Desk personnel can provide assistance if necessary.
- **E-mailing the CERN Service Desk** at service-desk@cern.ch from your external email address (from your university or service provider). **Please attach a copy of your identification document** (identity card or passport).
  Once you have contacted the CERN Service Desk, if it is not possible for you to send a copy of your identification document, you can send a copy by fax at the following fax number +41 22 766 84 88.

The CERN Service Desk is open from 07:30 - 18:30 work days, CEST.

Step 2:

Once you have the temporary password for your CERN account, go to the **account management site** http://cern.ch/account and perform the following actions:

1. **Log in** with your login name and the temporary password;
2. **Immediately change your password** by selecting the link "Change or reset password";
3. If you wish to change your login name, please follow the procedure detailed under "Help: Special Operations". Note that this is only possible within a week of the account activation;
4. **Follow the online course and sign the computing rules** following the "Sign Security & Computing Rules" link. You must **pass the short multiple-choice test and digitally sign the computing rules within 5 days of activation** otherwise your account will be deactivated and you will then need to contact the CERN Service Desk again and repeat the whole procedure from the start;
5. **Check your CERN mailbox** for official communications using your mail client or Webmail: http://www.cern.ch/owa.

Step 3: (Optional)

By default, email messages will be sent to your **CERN mailbox** (e.g. messages from the CERN administration).

- If you do not wish to use your CERN mailbox but prefer to use an existing external mailbox as a replacement you must connect to the site http://cern.ch/account (Manage my Accounts → Use an external email address). You won't own a CERN Mailbox anymore and messages addressed to you will be delivered to your external mailbox.
- Alternatively, you can configure your CERN mailbox to forward your mails to your external mailbox (http://cern.ch/account, Manage my Accounts → Set Forward).

Get Help

- If you have any questions or need help, please contact the CERN Service Desk 77777 (+41 22 76 77777 from outside CERN), or Service-Desk@cern.ch.

V2.5 2012/06/21

1. Au Service Enregistrement (Bat 55/1),
   vos comptes ‘Primary’, mail et EDH sont crées,
   en même temps que votre carte d’accès,

2. Activation des comptes au Service Desk (B 55/2-001)
   - ► Borne au Service Desk avec carte d’accès
   - ► Envoyant un scan de votre pièce d’identité avec e-mail extérieur au Service Desk

➔ Mots de passe temporaire: 1/ ‘Primary Account’ 2 / Signature EDH

1. Changez immédiatement vos 2 mots de passe

2. 5 **vrais** jours pour suivre le cours de sécurité et signer le règlement informatique OC5

Network Connection Request Form V 9.20.

akhodaba
logged in

Main Menu

Please select carefully the action you want to perform on the system - Should you choose the wrong option, your request may be refused or introduce additional delays in its execution.

View the registered information about a device

Select this is you want to display information about a device registered in our databases.

Update the registered information about a device

Select this is you want to correct information about a device such as Responsible person, operating system, interface cards, IP name or aliases,... You cannot use this link if you request change of domain (see service change). You must also use this option if you want to change access in the Main CERN Firewall.

New Connection of a device

Select this when a computing device has to be connected for the first time to the CERN computer network. Once the request has been filled, you will be provided with all the information needed to connect this device (e.g. IP address). For Portables, use "Portable Computer Registration".

New Connection of a Terminal

Select this when a Simple RS232 Serial Connection has to be performed. If you do not want to connect over low speed RS232 protocol, use 'New Connection of a device'.

Move and Reconnection of a device

Select this when a device which is already connected to the CERN network has to be moved physically to a new place where it has to be reconnected to the network.

Removal of a device

Select this when you want to disconnect a device from the CERN network (permanently or not).

Service Change of a device

Select this when a device which is already connected to the CERN network needs to use a different type of Network service, or changes its medium type (e.g. moves from Ethernet to Fast-Ethernet) without geographical move, or if you want to change Domain.

Portable Computer registration

Select this when you want to register a Portable Computer at CERN which will ONLY connect to Portable outlets; You will not get any IP address, nor any dedicated plug on the network! DO NOT use this if you want to register a device (Portable or not) which will connect (at least once) to a regular plug.

Connect Portable Outlet

Select this when you want to request a new Portable outlet in an office.

Disconnect Portable Outlet

Select this when you want to request the removal of a Portable outlet in an office.

Last Operation

Select this when you want to know the status of a submitted request

MAIS

Ne faire aucune modification non autorisée au réseau du CERN

- Utiliser les services mises a disposition (impression, wifi)
- Nous contacter si des besoins ne sont pas couverts

Dans le respect des règles de sécurité notamment

Suivez les règles informatiques

http://cern.ch/computingrules

- Dans le milieu académique du CERN (comme à la maison) vous êtes responsable de la sécurité de vos ordinateurs, fichiers, programmes, services
- L’ équipe de sécurité informatique et le département IT sont là pour vous aider dans cette tâche
- Votre activité ne doit pas être illégale, commerciale, politique, offensive
- N'est pas autorisé : consultation de matériel pornographique ou autre matériel illicite (e.g. incitation à la violence, discrimination)

Protégez vos ordinateurs

Utilisez un logiciel anti-virus et appliquez les mises à jour de sécurité régulièrement

L’anti-virus CERN est gratuit pour l’utilisation domestique

Prudence avec emails et web

Stop - réfléchissez - cliquez

N’ouvrez pas les liens, emails ou pièces jointes inattendues ou suspectes

Protégez vos mots de passe

Ils sont personnels
Faites-les complexes
Ne les réutilisez pas
Ne les publiez pas
Protégez votre écran

Respectez le droit d’auteur

Ne distribuez pas de matériels avec des droits d'auteurs

Evitez les applications de partage de fichiers ou des services d'hébergement

Pour la sécurité

- Utilisez les services IT &
  laissez IT s'occuper de la sécurité
- Bénéficiez de formation et d'aide:
