Argon Emulation in The Simulation of The ATLAS Transition Radiation Tracker

Monday 2 July 2018 14:55 (15 minutes)

Implementation of gas type emulation in the digitization software of the ATLAS TRT. The primary purposes of emulation are to be able to accommodate for a sudden change in the gas mixture used for data, and for efficiently simulating different gas type geometries to test particle identification performance.

Presenter: HAMD AOUI, Hassane (Universite Mohammed V (MA))

Session Classification: Nuclear and Particle physics
