# House/flat renovation: have you ever....?

- NO!
  - It might happen!
- YES, I already suffered those pains!
  - It might happen **AGAIN!**

# What do you (maybe) want??

- Go-green
  - (if not fully, at least try a bit!)
- Get good “artisans”
- New fancy house security system
- Save money?

# Reality:

- My French is not as fluent as I thought
  - Yours is maybe better, but are you able to understand really all the tiny technical details?...
- Laws (e.g. incentives) I (think I) knew in my country are actually different here
- Here around is expensive
  - At least wrt what my dad tells me!
- Difficult to get good unbiased suggestions!

# How: share experience!

- CERN: many competencies!
  - And we are curious!
- We have many people who, moving from abroad, came here and (re)did a lot of things in their flats/houses

## Why not share our experiences?

- Unbiased skilled suggestions can be huge time (and money) saving
