

CERN RIDES mobility app

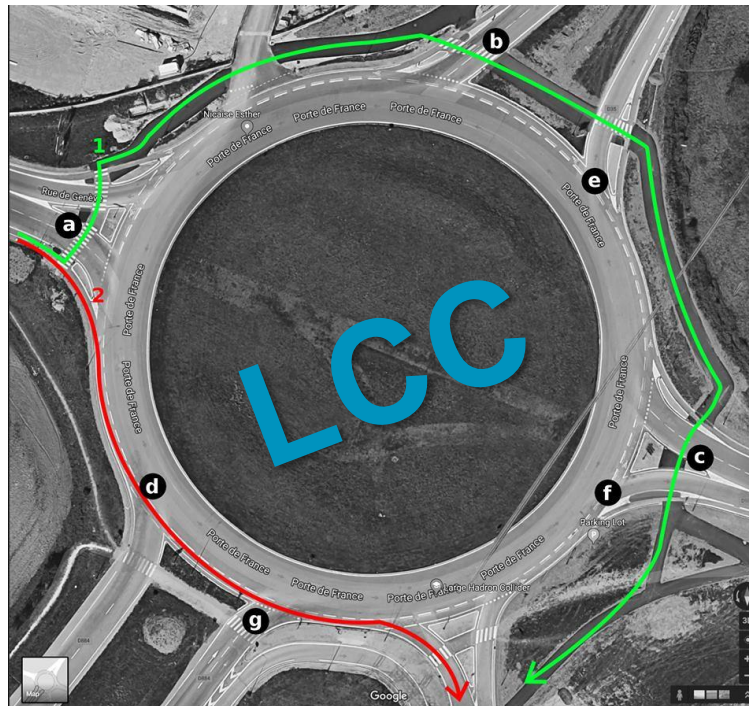

Green team

Technology's benefits

- Collaborative economy
- Reduces greenhouse gases emissions
- Saves time
- Reduces travel time for CERN employees
- Eliminates the need of car ownership for short-term employees at CERN
- Reduces parking space problems at CERN
- Possibility to expand it to other large organizations and/or cities

Users

- 12.000 people work at CERN
- Lack of public transport and lack of CERN shuttle services between Meyrin and Prevezin

Viability

- Raspberry Pi for the prototype
- CERN Nice account for registration
- APPs to create APPs for the prototype → Appypie
- Possibility to use GitHub
- Use of OpenStreetMaps
- Open source is one of the missions of IT at CERN
- Successful preliminary market survey
- Engagement of software developers
- Engagement of UX designer

GitHub

NICE Services

Join our team!

- Have a lot fun developing an app!
- Have direct impact on your community!
- Learn a new high demanded skill for your future!
- Maybe other large organizations are interested in the idea!
- We can make it real!
