

Global Climate Monitoring Network

Our Planet is Heating up

Mer Demain	Jeu 1/2	Ven 2/2
		
31 °C	32 °C	33 °C
26 °C	26 °C	26 °C
← 12 km/h	↙ 22 km/h	↘ 28 km/h
💧 0.2mm	💧 0.5mm	
☀️ 4h	☀️ 5h	☀️ 6h
 	 	 

BUT: We **don't** know:

- How much?
- How fast?
- Where can we still live in the end of this/
next century.

⇒ We need **predictions**

⇒ We need **data**

Goal

- Global network CO2 and temperature, especially in the developing countries: Asia, Africa, South America.

Means

- Cheap Reliable Measurement Devices (technology exists)
- Educational institutes involved
- International organisations involved (CERN, UNICEF, WMO)
- Getting local people involved!

We still have the chance: let's **SAVE THE
PLANET.**
