

# Special Events and Exhibitions

14th IPPOG Meeting at CERN - 2-4 November 2017

**Sascha Mehlhase** (LMU Munich)

# Panel report

## ▸ special events

- encourage people to try going to new places and audiences and support them
  - see e.g. [Connie's talk](#) and [contact her](#)
  - other projects / suggestions: hotel entertainment, amusement parks, ...
  - support could be proper material (or references to it)
- can / should we do more?
  - should we scout and approach people (inside and outside physics)?!

## ▸ exhibitions and exhibits

- dedicated working group should
  - work closely with new web-site effort to define new resources data base to make it more useful
  - identify exhibits that could be added to (new) resources data base (e.g. CERN exhibits, reusable 'left-overs', ...)
  - think about an intermediate solution (list, ...) to keep track of exhibits (or make sure current data-base entries are propagated and extended)
  - make a list / data base of available material and where to get it (e.g. printed brochures or posters; things not really suitable for resource data base)

## ▸ general

- make 'proposals' for small budget 'projects'
  - e.g. for printing (IPPOG) brochures or IPPOG travel (if not supported by institutes)
  - what are application guidelines
