

HSF Packaging Group, #13

Graeme Stewart, CERN EP-SFT

Convenor 2.0

- Ben Morgan has agreed to be the second convenor of the group
 - Thank you Ben!

Today's Meeting

- We have an update from Patrick about Spack
- Ben will kick off our considerations about containers
 - I hope this will prompt other people to share experience in their experiment
 - Which will start to form our general ideas about integrating with containers
- We should think about defining a basic stack for our test bed
 - All of LCG is quite big - can we define a subset?
 - Ideally this would be a stack that can be used by a (small?) experiment

Practical matters:

- Keeping to the 2 week cycle, we'd next meet on November 15
- This time seems to be suitable and there is a room at CERN
