

International Workshop on Breakdown Science and High Gradient Technology (HG2018)

Contribution ID: 38

Type: **not specified**

XBOX Operation and performance

Tuesday 5 June 2018 11:50 (25 minutes)

There are 3 X-band test stands at CERN dedicated to the high gradient testing of prototype accelerating structures and RF components. This speech will cover the operational challenges, the upgrades in the algorithms for conditioning and the status of the stands during the last year.
