

15th Varenna Conference on Nuclear Reaction Mechanisms

Thursday, 14 June 2018

Potential, strangeness, pion (17:15 - 18:45)

-Conveners: Jutta Escher

time	[id] title	presenter
17:15	[15] Microscopic Optical Potential Derived from $\$NN\$$ Chiral Potentials.	Prof. GIUSTI, Carlotta
17:45	[88] Production of strange particles and hypernuclei in spallation reactions from the coupling of intranuclear cascade and de-excitation models.	HIRTZ, Jason
18:15	[79] Isospin of pions - what do they tell us about the neutron skin of nuclei?	HARTNACK, Christoph
