

HSF-WLCG Cost and Performance Modeling Working Group

Wednesday, May 16, 2018 12:10 PM (20 minutes)

The working group has been established and is now working towards a cost and performance model that allows to quantitatively estimate the computing resources needed for HL-LHC and map them towards the cost at specific sites.

The group has defined a short and medium term plan and identified the main tasks. Around the tasks teams with members from experiments and sites have formed and started concrete work. We will report on the goals and status of the working group.

Desired length

15

Primary authors: SCIABA, Andrea (CERN); SCHULZ, Markus (CERN); FLIX MOLINA, Jose (Centro de Investigaciones Energéticas Medioambientales y Tecnológico)

Presenter: FLIX MOLINA, Jose (Centro de Investigaciones Energéticas Medioambientales y Tecnológico)

Session Classification: Computing and batch systems

Track Classification: Computing & Batch Services
