

A smorgasbord of tools around Linux at DESY

Thursday, May 17, 2018 3:00 PM (20 minutes)

In the past, we have developed lots of smaller and larger tools to help in various aspects of Linux administration at DESY.

We present (some) of them in this talk.

An incomplete list is:

- Two-Factor-Authentication
- Timeline repositories
- Making Kernel upgrade notifications (more) audit safe
- Fail2ban

Desired length

20
